NoteMaster

Installation

To clone and run this repository you'll need Git and Node.js (which comes with npm) installed on your computer. From your command line:

```
# Clone this repository
git clone git@github.com:tejas01101001/NoteMaster.git
# Go into the repository
cd NoteMaster
# Install dependencies
npm install
# Run the app
npm start
```

Note: If you're using Linux Bash for Windows, see this guide or use node from the command prompt.
